1 OVERVIEW :

This manual provides the step-by-step user guide for the iMart Ecommerce System. Imart has the following features:

      1.1 Online Catalogue

            I.   Search and share products

            II.   Purchasing products

      1.2 Online Registration function

      1.3 Order Processing

            I.   Available stock

            II.   Past Orders listing for users

            III.   Account information

The address to the imart portal is: https://192.168.2.235/ **(Connection to IIITD VPN is required)**

2 Visitor (Unregistered) :

A visitor to the site is essentially an unregistered user. A visitor can:

   2.1 Browse the Product Catalogue

       2.2 Register for iMart:

   2.2.1 As Buyer

   2.2.2 As Seller

The imart home page is shown below.

2.1 Browse the Product Catalogue

Click on Browse product button which will redirect to catalogue of all products.When you click on the Product Search link you will be able to search the products.

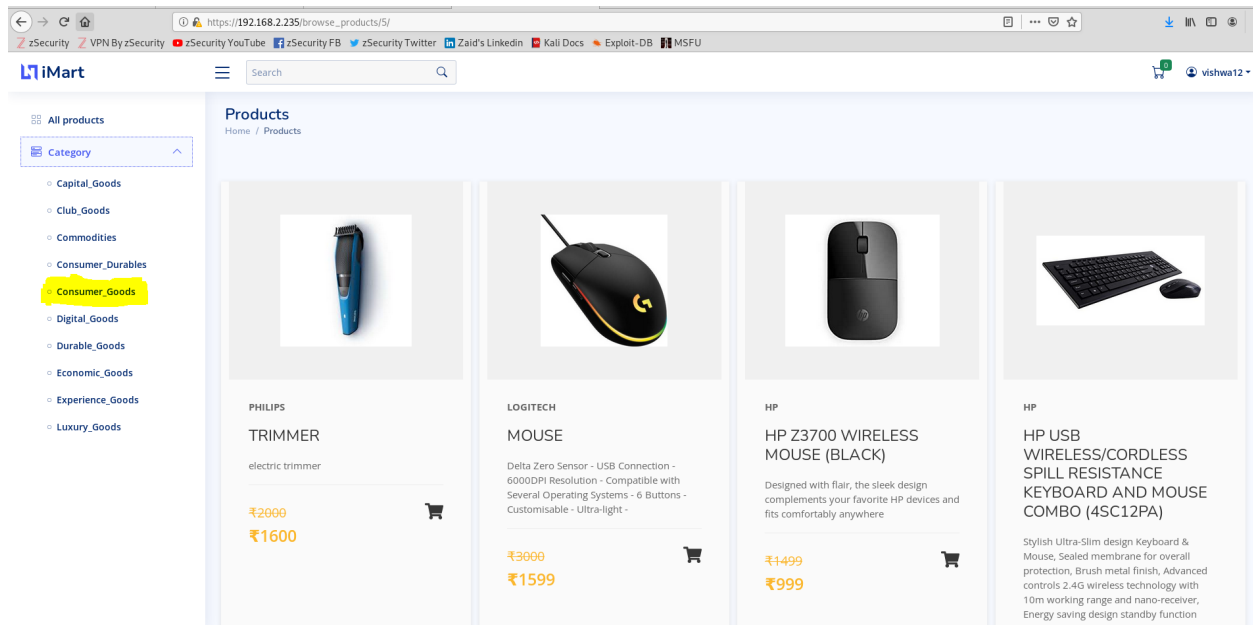

2.1.1 Search by Name

You will also be able to search for products by entering the required keyword in the search bar as shown below.
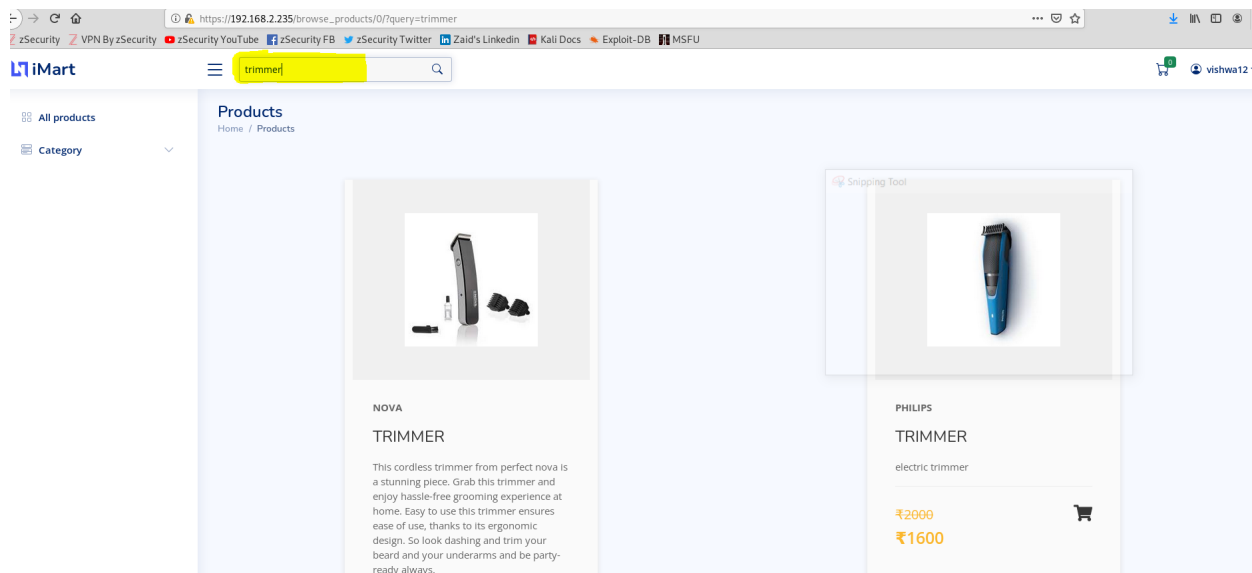

2.1.2 Search by Category

You can search for products belonging to a specific category by clicking on the required category name in the left pane as shown below.

2.1.3 Share Product

You can share products with others by clicking on the share product button on the product page which will copy the link of that particular product. Share the link that is copied in your clipboard.
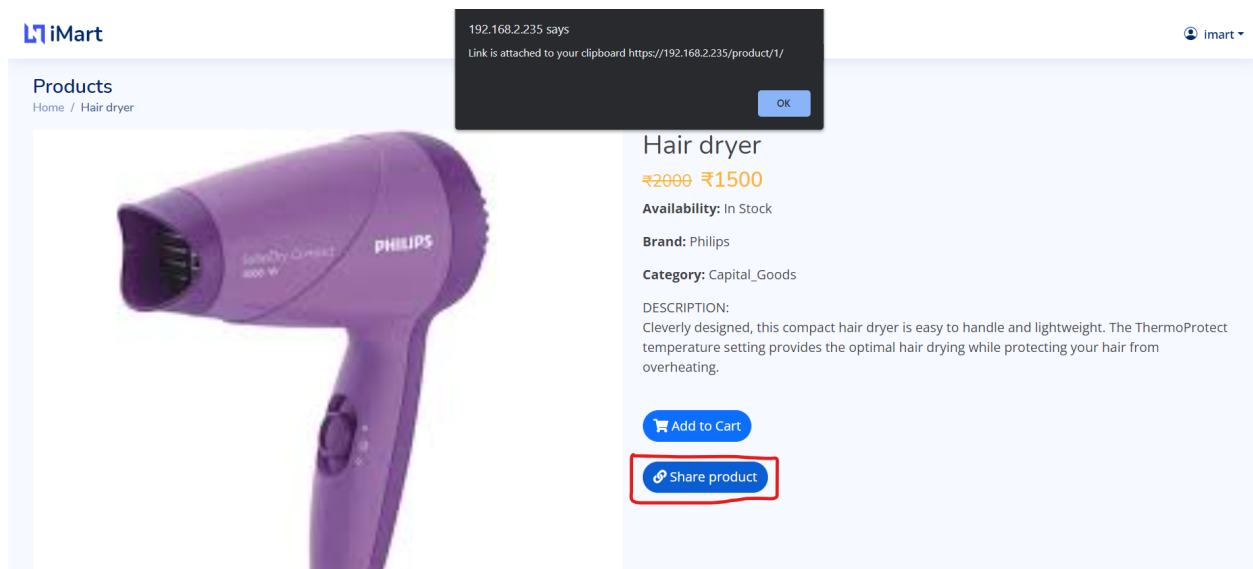

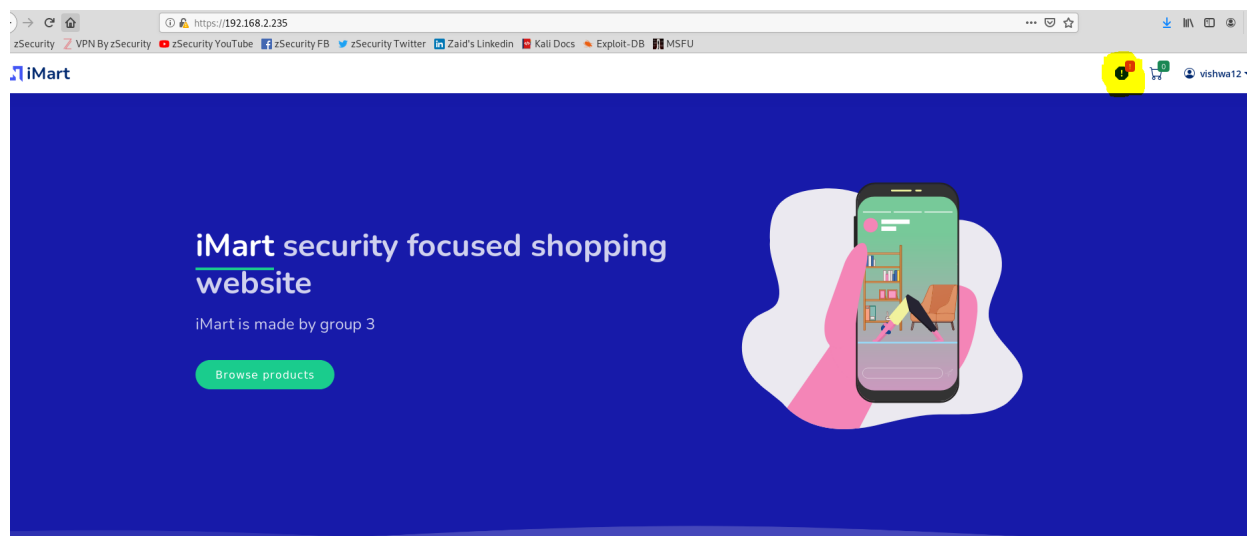

2.2 Register for iMart
2.2.1 As a buyer
To register for iMart, select the Register option in the top left hand box.

This will take you to the online registration form. Customers are asked to complete this form (all fields marked are mandatory) and click Ok.

Initially your account will be unverified. You will receive a link for validating your account by email. If you did not receive the link on email you can send it again by clicking on the button below which shows the user unverified.
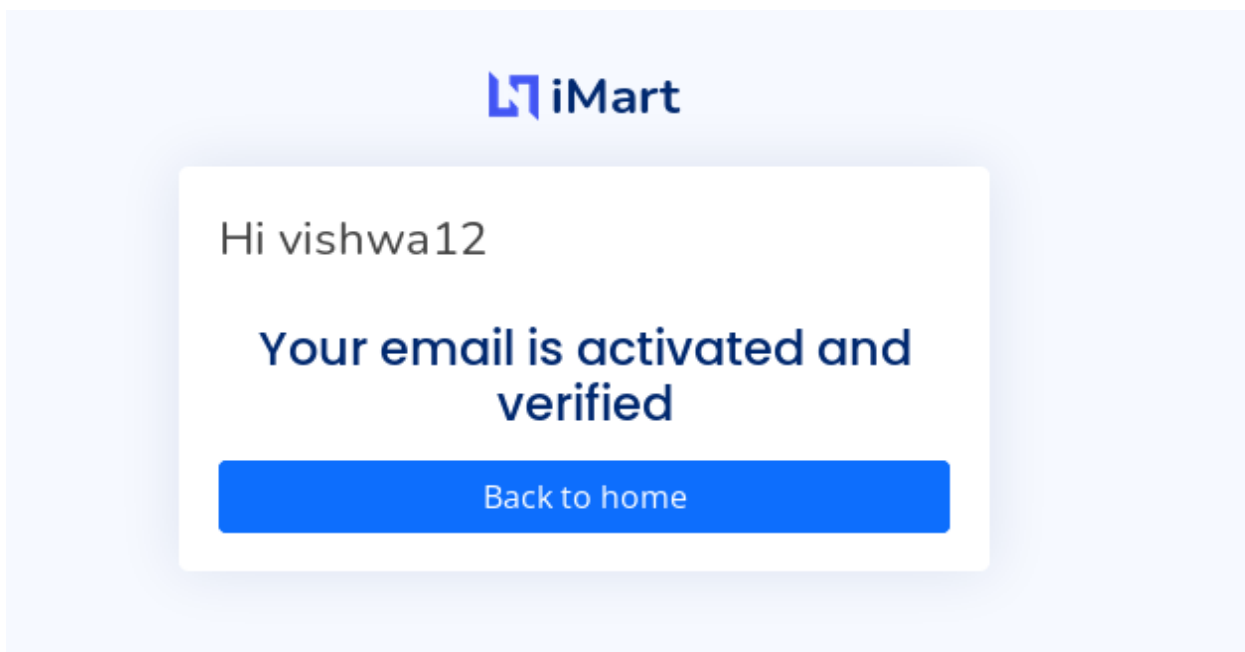

Your verification link will look like this:

imartwebsite@gmail.com   9:10 PM (3 minutes ago)
to me ▾

Hi vishwa12,
Please click on the link to confirm your registration,
http://192.168.2.235/activate/(%3FPMTk%5B0-9A-Za-z_%5C-%5D+)(%3FPavygvt-26922abaf2d970b7b47ce5f4236799f5%5B0-9A-Za-z%5D%7B1,13%7D-%5B0-9A-Za-z%5D%7B1,20%7D)/$

Once you have been validated by the system, you will see a screen as below:

2.2.2 As a Seller

Seller can register by uploading registration documents and can login only after his/her application has been approved by the admin.

Register as a seller by clicking on "Register as seller".

Enter the required fields.

Wait for the admin to approve your account. Once the account is approved you can upload your product to sell.
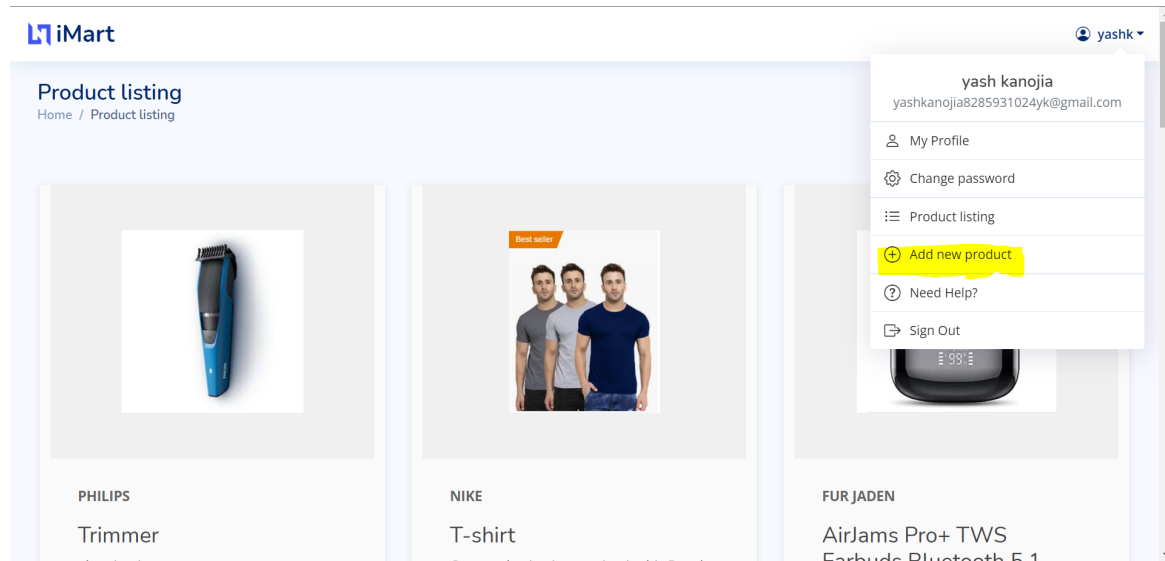

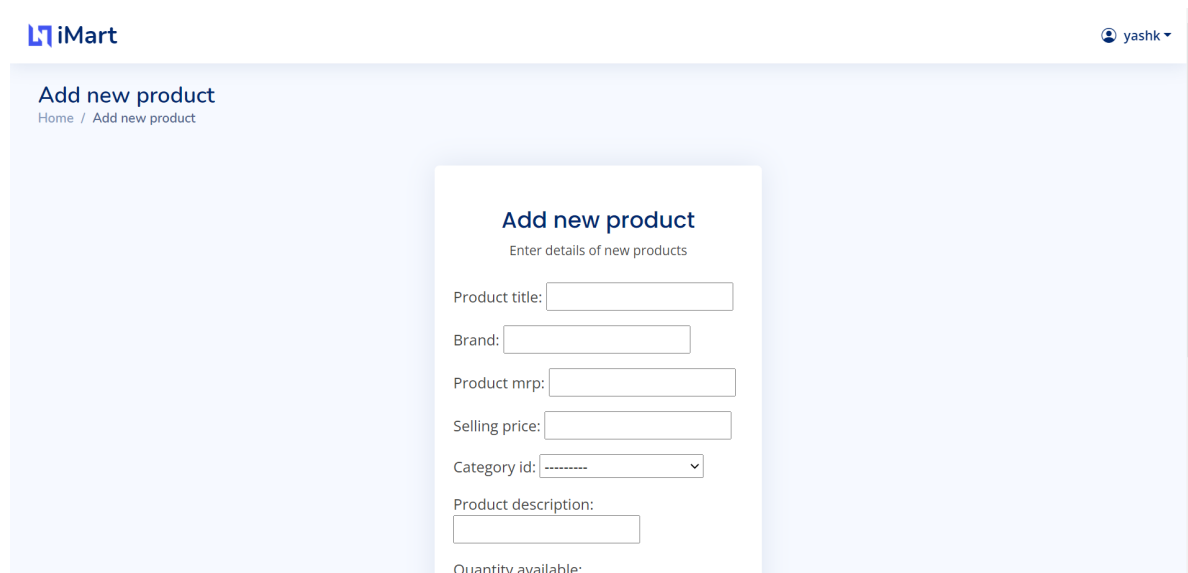

3 Seller features

3.1 Add a product

Seller can add a new product by clicking on Add new product button which will lead to a page asking for product details and images and upon clicking on submit button, product will be added to his/her catalogue.

Step 1: click on "Add new product"

Step 2 : Fill in all the details of your product and click on the "Submit" button.

Step 3: you can see all your products in "product listing".

3.1 Edit and Delete product

Sellers can view all existing listings by clicking on the Product listing button. After that list of available products will be displayed along with an edit and delete button with each listing. Clicking on the respective button will perform the mentioned action.
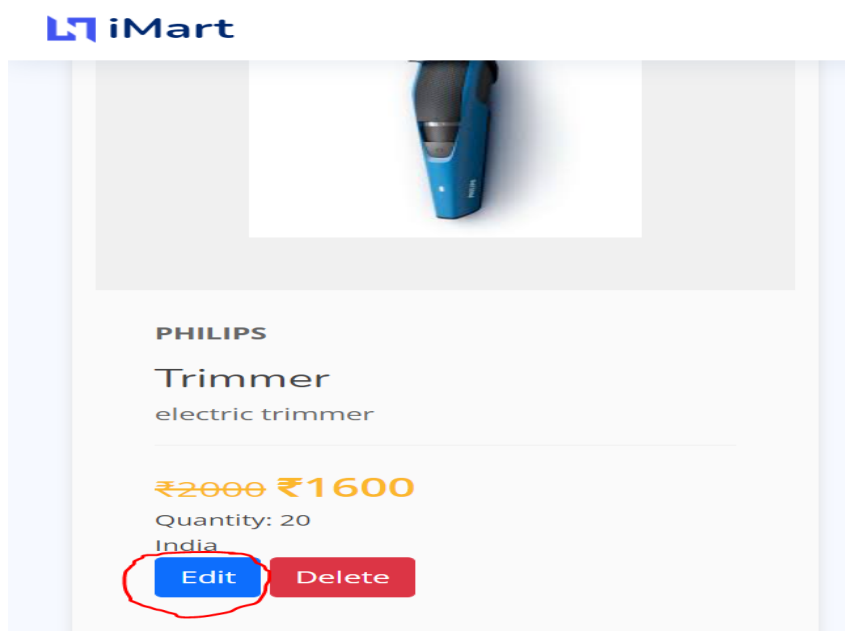

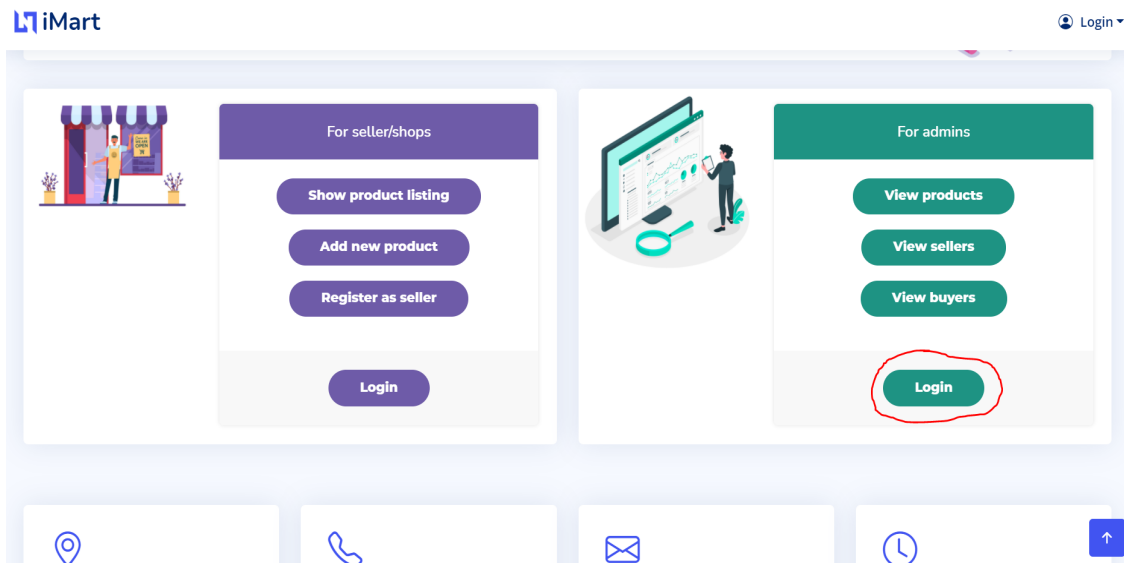

4 Admin features

4.1 Approve Seller

Admin can approve respective sellers by clicking on the Approve button present with the respective seller. Admin can also view/open registration documents uploaded by sellers.

4.2 Disapprove Seller

Admin can disapprove of any seller by clicking on the delete button present in front of the respective seller in the approved sellers tab.

4.3 Delete Listing

Admin can view all listings of any seller by clicking on the listings button present in front of the respective seller in the approved sellers tab and also delete any of the products of that particular seller.

Password : lmart@123

User3 : admin1
Password: adminpass@123

User4 : admin3
Password: lmart@123

User5 : admin4
Password : adminpass@123

10 Tips for creating a strong password :

Following tips will help you to build a stronger password.

Tips for creating a good password	Examples
Use the first letters of a phrase you like, then add a number, punctuation mark, or uppercase letter in the middle. Even better is an obscure phrase or line from a favorite song, book, movie, or poem. In your phrase, replace words with numbers or letters (be=B, to=2, too=2, for=4, are=R, see=C, you=U, why=Y).	pag4ks passwords are good for K-State pag4mt passwords are good for me too pag4m2 passwords are good for me too
Include numbers. Put one or more numbers in the middle of the password. Or use three or more numbers at the beginning or end. Or use all numbers.	pagb7in passwords are good but 7 is not pagbn200 passwords are good but not 200
Use punctuation marks. A question mark or exclamation mark can add emphasis to a password phrase you've chosen. You can use any of the basic punctuation marks on a keyboard: ! @ # $ % ^ & * ( ) _ + - = { } | [ ] \ : " ; ' < > ? , . /	pagfm? passwords are good for me? pag,rtn? passwords are good, are they not?
Mix uppercase and lowercase letters.	paGfm2 passwords are GOOD for me too
Reverse part of a word or phrase to make a nonsense word. Then add a number, punctuation mark, or uppercase letter in the middle.	paS-drow

Things you shouldn't use for passwords
- Don't use building names and codes and all kinds of sports jargon.
- Don't use the first or last names
- Don't use your personal numbers (age, phone number, postal address) or ID codes (date of birth, driver's license, IC). Those numbers are more public than you think, especially with search engines and the Web.
- Don't include any known information about you, such as parts of your computing ID, name, address, pet names, friends' names, family names, hobbies, or favorites.
- Don't use well-known phrases like "gwtw" (Gone With the Wind) or "2brnot2b" (to be or not to be).
- Don't use obvious number sequences such as "123456" or "8765432".
- Don't use a real word, whether English, foreign, medical, sci-fi, etc.
